

Quality Improvement

Associated NEMSIS Protocol(s) (eProtocol.01) (for additional information, go to www.nemsis.org)

- 9914147 – Medical - Supraventricular Tachycardia (including A-FIB)
- 9914151 – Medical - Ventricular Tachycardia (with pulse)
- 9914199 – Medical-Tachycardia

Key Documentation Elements

- Initial rhythm and all rhythm changes
- Time, dose, and response to medications given
- Cardioversion times, synchronization, attempts, joules, and response
- Obtain monitor strips after each intervention
- Patient weight
- Pediatric length-based tape color (for pediatrics who fit on tape)
- History of event supporting treatment of underlying causes

Performance Measures

- Time to clinical improvement from patient contact
- Blood sugar obtained
- Correct medication(s) and dose given for patient condition, age, and weight
- Correct cardioversion joules delivered given patient weight and/or condition
- Use of sedation for responsive patient
- ***National EMS Quality Alliance (NEMSQA) Performance Measures*** (for additional information, see www.nemsqa.org)
 - *Hypoglycemia—01: Treatment Administered for Hypoglycemia*
 - *Pediatrics—03: Documentation of Estimated Weight in Kilograms*
